

Contents

Preface		i-ii
A report on paleotsunami study in Hiranuma lowland, on the Pacific coast of Aomori Prefecture, northeastern Japan	Koichiro Tanigawa	1-14
Coring survey of tsunami deposits in a coastal lowland in Tsu City, Mie Prefecture	Dan Matsumoto	15-30
A preliminary report on paleotsunami study in Okitsu lowland, Kochi Prefecture, western Japan	Koichiro Tanigawa, Masanobu Shishikura, Osamu Fujiwara, Yuichi Namegaya and Dan Matsumoto	31-38
Shallow subsurface geometry and late Quaternary faulting of the Saga-heiya-hokuen fault zone (northern marginal fault zone of the Saga Plain), central Kyushu, as revealed by seismic reflection profiling, densely spaced boreholes and trenching	Tadashi Maruyama, Masaru Saito and Masaki Suehiro	39-89
Analysis of long-term trends of borehole strainmeter data and its comparison with crustal stress measurements	Tsutomu Kiguchi, Yasuto Kuwahara and Norio Matsumoto	91-116
Visualization of high-resolution DEMs using stereo contour and relief maps	Yasuo Awata	117-136
